**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 7-14, 16, and 17, drawn to a crystallizer.

Group II, claim(s) 18-22, drawn to a method for casting.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the method for casting of Group II (claims 18-22) lacks technical features of the crystallizer of Group I (claims 1-5, 7-14, 16, and 17), as the method of Group II (claims 18-22) includes the steps of determining the melting stock and cooling medium velocities, as well as causing a “neck-in treatment”, all of which are lacking in Group I. Furthermore, Group I includes the technical features of the plurality of position-limiting parts and the drain pipe, all of which are lacking in Group II. As a result of the lack of the same or corresponding special technical features, no single general inventive concept exists. Therefore, restriction is appropriate.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
